# Are dual lens cameras such as the Mobotix D12 camera supported by OnGuard?

Last Modified on 10/06/2022 4:14 am EDT

## Question

Are dual lens cameras such as the Mobotix D12 camera supported by OnGuard?

## Answer

There are currently a small number of dual lens cameras that are supported in OnGuard. However, the dual lens feature itself is **not** currently supported.

In some cases, changing settings in the camera's Web page **might** make both lenses viewable by OnGuard applications, but the software itself has no settings to control this feature.

## Applies To

LDVR (All versions)
LNVR (All versions)
OnGuard (All versions)
OnGuard Enterprise (All versions)

## Additional Information

This is something that has been discussed for a future enhancement of the software. However, this feature is not currently in development.
