Question

What is the maximum Badge ID that can be imported using the Basic Import Utility?

Answer

The largest badge ID that can be imported by the Basic Import Utility is 2^31 or 2,147,483,648.

This is a hard limitation of the utility.

If adding larger Badge IDs is necessary, the workaround is to enter them manually, or obtain a license for DataExchange and create a DataExchange script to import the badge information.

Applies To

OnGuard (All versions)
