

Tango printer printing back of badge on second badge

Last Modified on 10/06/2022 4:15 am EDT

Symptom

Tango 2E printer prints the back of a badge on the second card after verifying that the badge design is correct.

Resolution

1. Select **Start > Printers and Faxes**, and then right click on the Magicard Rio/Tango 2e and select **Printing Preferences**.
2. On the **Printer** tab under **Printer Model**, select **Tango 2E**. If **Rio** is selected, the printer will print the back of the badge on the second card because the Rio printer cannot flip badges.
3. Under **Duplex Printing**, select **Both Sides**.

Applies To

OnGuard (All versions)
