Installing a certificate on a Mercury Access Panel

Procedure Steps

Use the Load Certificate page allows factory installed Mercury certificates to be replaced by unique custom certificates

1. Log into the Access Panel configuration page.
2. Click **Load Certificates**. A window similar to the following should display:

The screenshot displays the web interface for the LNL-4420 Intelligent Dual Reader Controller. On the left is a navigation menu with the LENEEL logo and options: Home, Network, Host Comm, Device Info, Users, Auto-Save, Load Certificate (highlighted), Security Options, Diagnostic, Restore/Default, Apply Settings, and Log Out. The main content area is titled 'LNL-4420 Intelligent Dual Reader Controller' and 'Load Certificate'. It contains two sections: 'Load Certificate' and 'Load Peer Certificate'. The 'Load Certificate' section has two file selection prompts: 'Please specify a certificate file (*.cert):' and 'Please specify the private key file (*.pem):', each with a 'Choose File' button and 'No file chosen' text. Below these is a 'Load certificate files' button. The 'Load Peer Certificate' section has a 'Please specify a peer certificate file (*.cert):' prompt with a 'Choose File' button and 'No file chosen' text, and a 'Load peer certificate' button. Below the 'Load Certificate' section is a 'Certificate Information' table with the following data:

Issued to:	MAC000FE503CC5A
Issued by:	Mercury Security Certificate CA 1024
Valid time:	from 06/02/2015 to 12/30/2043

The 'Load Peer Certificate' section is followed by a 'Peer Certificate Information' table with the following data:

Issued to:	
Issued by:	
Valid time:	from to

3. Click **Chose File** to specify a certificate file (*.cert).
4. Browse to the location of the desired .cert file.
5. Click **Chose File** to specify the private key file (*.pem)
6. Browse to the location of the desired .pem file.
Both .cert and .pem files must be selected to load certificate files.
7. Click **Load Certificate Files**.
