

Update or Delete Failed message when attempting to modify Access Levels or Timezones

Last Modified on 10/06/2022 4:16 am EDT

Symptom

When attempting to update Access Levels or Timezones, an onscreen message is displayed:

Update or Delete Failed. This is caused by an incorrect setting on the Database Server.

Resolution

To resolve the issue:

1. Open SQL Server Management Studio.
2. In the Object Explorer, right-click the server name and select Properties.
3. In the Server Properties page, select the Connections page.
4. On the Connections Page, under Default connection options, de-select No Count.
5. Restart the SQL Server Service (usually SQL Server [MSSQLSERVER]).
6. The Update or Delete Failed message should no longer show when modifying Access Levels or Timezones.

Applies To

OnGuard (All versions)
