

Class encoding stop working error "the encoding failed do the Protected application error code 0x80042007"

Last Modified on 10/06/2022 4:16 am EDT

Symptom

The following error appears when iClass encoding stops working:

"the encoding failed do the Protected application error code 0x80042007"

Resolution

The card format for the Access Control Key Type was changed from **HID** to **Lenel**. To resolve this issue, change the card format back to **HID**.

Applies To

OnGuard (All versions)
