How to configure SQL Server 2005 Express if the installation utility was not used.

How to configure SQL Server 2005 Express if the installation utility was not used.

Procedure Steps

1) Click the **Start** button, then select **All Programs** > **SQL Server 2005** > **Configuration Tools** > **SQL Server Configuration Manager**.

2) Expand **SQL Server 2005 Network Configuration** and click **Protocols for MSSQLSERVER**.

3) Make sure that the **TCP/IP** and **Named Pipes** protocols are enabled. If they are not, right-click the protocol and select **Enable**.

4) Exit **SQL Server 2005 Network Configuration**.

5) Click the **Start** button, then select **All Programs** > **SQL Server 2005** > **Configuration Tools** > **SQL Server 2005 Surface Area Configuration**.

6) Click the **Surface Area Configuration for Services and Connections** link.

7) Expand **MSSQLSERVER** > **Database Engine** and click **Remote Connections**. Enable the **Local and remote connections** and **Using both TCP/IP and Named Pipes** radio buttons.

Applies To

SQL Server 2005 Express

Additional Information

Alternatively, you may choose to uninstall SQL Server 2005 Express and re-install it with the installation utility found at customer.lenel.com. The utility can be found under **Technical Support Tools** > **Installation Tools**.
