Basic Import Utility will not work with Oracle database

Last Modified on 10/06/2022 4:17 am EDT

Symptom

Import utility fails when run with Oracle

"Unexpected application error occurred. Write these codes down, Error 3011 internal code 11196100. The Microsoft jet data base engine could not find the object 'badge'. Make sure that the object exists and that you spell it's name and the path name correctly."

There may be other error messages seen for this issue.

Resolution

The Basic Import Utility only works with Microsoft SQL Server. If you are using Oracle, you must import using DataExchange. For more information on DataExchange, refer to the FormsDesigner User Guide.

Applies To

OnGuard (All versions)
Oracle (All versions)

Additional Information

For more information, refer to the Basic Import Utility User Guide.
