

# Installing 32-bit Oracle 12c Client on Windows Server 2012 R2

Last Modified on 10/06/2022 4:17 am EDT

## Problem Overview

Problem installing 32-bit Oracle 12c Client on Windows Server 2012 R2

## Detailed Description

The installation wizard cannot install 32-bit Oracle 12c Client on a Windows Server 2012 R2 workstation. To install the 32-bit Oracle 12c Client successfully, prepare the workstation as follows before performing the installation:

1. Manually install Microsoft Visual C++ 2010 x86 Redistributable Package.
2. Create a registry key under the Wow6432 Node. Save the following into a .reg file, and then run it:

```
Windows Registry Editor Version 5.00
```

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ORACLE]
```

```
"inst_loc"="C:\\Program Files (x86)\\Oracle\\Inventory"
```

## Applies To

OnGuard

## Additional Information
