Question

If my computer does not have a serial port, can I still connect a Guardall control panel via the serial connection or the PX serial module?

Answer

Yes, this is possible by using a USB-to-serial converter.

Lenel has tested the Prolific UC310 USB-to-serial converter with the Guardall PX panel.

Other types of USB-to-serial converters may work, but Lenel has not tested these and cannot guarantee their functionality.

Applies To

Guardall PX/QX/RX Control Panels

Additional Information

None
