Manually Archiving Through SQL

Last Modified on 10/06/2022 4:18 am EDT

Manually archiving through SQL when the Database Maintenance Utility is not working, or when you would prefer to archive through SQL.

Procedure Steps

1. Log into SQL Server Management Studio.
2. Expand **Databases**.
3. Expand the **SecurePerfectHistory** database.
4. Expand **Programmability**.
5. Expand **Stored Procedures**.
6. Right-click on **BackupData** and select **Execute Stored Procedure**. This procedure moves data from history to the archive.
7. After the query completes, right-click on the SecurePerfectHistory database and select **Tasks > Shrink > Database**. This shrinks the history database to the correct size.
