Restoring Databases Through SQL

Procedure Steps

1. Stop all FCWnx services.
2. Open **SQL Server Management Studio** and expand the **Databases** folder.
3. Right-click on the database you want to restore.
4. Go to **Tasks > Restore**, and click on **Database**.
5. Set the source to "from device" then click on the **ellipse** button.
6. Click the **Add** button and browse to the backup you would like to restore. Click **OK** twice.
7. The **select the backup sets to restore** box should now be populated with the backup you selected. Check the box next to it.
8. In the left-hand pane, click on **Options**.
9. Check the box next to **Overwrite existing database (with REPLACE)**.
10. For both the DAT and the log entry, click on the **ellipse** button and browse to **C:\Program Files (x86)\GE\FCWnx\Database**.
11. Click **OK** to start the restore process.

Applies To

FCWnx
