Upgrade Path From FCWnx 7.0 to 7.7

Last Modified on 10/06/2022 4:18 am EDT

Question

How do I upgrade from FCWnx 7.0 to FCWnx 7.7?

Answer

If upgrading from FCWnx 7.0 to any later version of FCWnx, ensure that Service Pack 3 has been applied to the system, and that the SP3 batch file has been run against the database.

IMPORTANT: When upgrading from any version of Secure Perfect, or from FCWnx 7.5.1 and earlier, copy the old system's Images folder into the FCWnx folder on the new system. The upgrade program loads the photo images into the database if the folder is there. If the folder and data are not there, a utility program must be used to import the photos into the database.

Applies To

FCWnx
