

IntelligentVideo Database Upgrade Utility

Last Modified on 10/06/2022 4:19 am EDT

Problem Overview

IntelligentVideo Database Upgrade Utility

Detailed Description

The IntelligentVideo Database Upgrade Utility is used to update IntelligentVideo event configurations to OnGuard 2010. This utility is found in the **Digital Video** folder on the Supplemental Materials disc, and should be run on the OnGuard database server as a final upgrade step.

Note: Prior to running this utility, make a backup of the **IVS.XML** file located on the IntelligentVideo Server at **/Documents and Settings/All Users/Application Data/Lenel/LNVSuite/IVS.XML**.

Applies To

OnGuard 2010 (6.4.500)

Additional Information

None
