Question

Is there a way to track, graph, or display bandwidth used by one camera, or all cameras, in SkyPoint?

Answer

Currently, there is no way to track, graph, or display bandwidth used by cameras in SkyPoint.

The System Status utility, which runs in the Windows system tray, displays the following camera data:

- Resolution
- Frames per second (FPS)
- Frame count
- KBs received
- Number of times camera has gone offline

Applies To

SkyPoint

Additional Information

None
