Error "Unhandled exception index is out of reach - must not be negative."

Last Modified on 10/06/2022 4:19 am EDT

Symptom

When using SkyPoint client there are circumstances, such as when modifying views, that might cause the "Unhandled exception index is out of reach - must not be negative" error.

Resolution

This error is generally caused when more than five monitors are used on the client system. There is a limit of four monitors supported by SkyPoint client. Disable any monitors beyond four, and the error should go away.

Applies To

SkyPoint
