

Deleting Badges from Onity Integra Locks

Last Modified on 10/06/2022 4:19 am EDT

Problem Overview

Deleting Badges from Onity Integra Locks

Detailed Description

When deleting badges from Onity Integra locks, at least 1 badge must always remain on the lock. Attempting to delete all badges will not succeed, and the lock will retain the same access privileges it had before the attempt was made. If all access to the lock is to be prohibited, some other mechanism such as blocking or changing schedules should be used.

Applies To

OnGuard 2010 (6.4.xxx)

Additional Information

None
