

Conflict Possible for Aux Output 1

Last Modified on 10/06/2022 4:20 am EDT

Problem Overview

Conflict Possible for Aux Output 1

Detailed Description

The user interface currently allows configuration of both Tailgate and Pre-alarm mode, both of which use Aux Output 1. These features should not be used at the same time due to a conflict with Aux Output 1.

Note: Not all pre-alarm configurations require Aux Output 1. The pre-alarm configuration that does use Aux Output 1 should not be used when using Tailgate or Alarm Shunt.

Applies To

OnGuard 2010 (6.4.xxx)

Additional Information

None
