

Update to Full Downloads Without Images

Last Modified on 10/06/2022 4:20 am EDT

Problem Overview

Update to Full Downloads Without Images

Detailed Description

When performing a full download without images, images at the Regional Servers remain intact. It is no longer necessary to manually move the images to the Regional Servers after a full download without images. OnGuard will also identify images that have changed and generate the necessary transactions for processing these photos in the background.

Applies To

OnGuard 2010 (6.4.500)

Additional Information

None
